

## Reference for Jennifer Buck Interior Design

We found Jenny Buck on the American Society of Interior Designers website in the fall of 2004. She was a major contributor and asset to our total remodel of our home. She brought two builders she had worked with to submit bids. The one we chose turned out to be fantastic.

Jenny drew up the initial architectural drawings and came up with a floorplan that we never would have thought of ourselves. She was especially good at space planning—storage space was one of our main objectives.

Since then, she has helped with every facet of our new home. She is very knowledgeable about all kinds of sources for furniture, lighting, window treatments, tile, etc., but she doesn't push you to buy things that don't fit your budget or taste. In fact, our tastes are very different, but she's achieved the results I had envisioned. She's very pleasant and fun and really wants you to be happy with how things turn out. When problems occur, as they always will in a big project, she diplomatically gets things fixed.

I would never in a million years have found the paint colors (14 in our house!), the fabrics, or the high-quality workmen that Jenny did. Everyone who visits comments on the colors. The house has a totally different feel than the old one.

Finally, we were very lucky to find someone who is so flexible. We changed our budget and our minds constantly. We are not easy clients.

I wish we had another house to do—I'd like to do it again!

Sincerely,

Cynthia Talaber      September 1, 2008
